Have you ever looked for a cologne but have had difficulty finding scents that fully embody you?

We created Uroma to solve this problem. Our product allows you to create your own custom premium Scent.

Unlike mass produce scents, our blends are made from quality ingredients and tailored to your scent preferences and style. We do this by offering our customers multiple 1 day samples. They get these samples by ordering online through a website where they pick ingredients to use. After realizing what scent you want you can order for it.

This is perfect for adolescents and young adults since it's quite expensive and draining to go shopping for colognes. Uroma provides a personalized, at home, and cheap alternative while maintaining quality.

We're redefining fragrance as self-expression and we are launching soon.

Our colognes' Uroma ingredients

1. 5 drops of Cedar Wood
2. 5 drops Rosemary
3. 2 drop Jasmine
4. 4 drops Lavender
